(54) THIN FILM CAPACITOR

(57)Abstract:

PURPOSE: To provide a thin film capacitor in which a polarizing direction of a ferroelectric film is inverted to be switched to vary a switching time in the capacitor using the film.

CONSTITUTION: The thin film capacitor comprises a first capacitor A having electrodes 3 formed on both side surfaces of a ferroelectric film 1 and an auxiliary second capacitor B so formed as to surround the periphery of the capacitor A in such a manner that a switching time of the capacitor A is regulated by an electric field applied to the capacitor B.

LEGAL STATUS

[Date of request for examination] 01.12.1998

[Date of sending the examiner's decision of rejection] 26.12.2000

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]
